

## Finerty's Resignation Letter Example

Dear Director Gelhorne,

I, Ed Finnerty resign from my job in Washington. I don't think that I, nor any of us are making an impact on our current society. I feel like these machines are morphing society into a machine itself and we are the cogs that run this machine. We are not living, we are merely being provided with life. Life itself is dull in this society, it lacks creativeness and color. It reminds me of crazy people who get locked up in pure white rooms with white clothing. In this society there is no opinion there, but rather only what needs to be done.

Believe it or not, dying slowly is different from living. Living is to experience and enjoy, to refresh yourself from the feeling of dying slowly. People aren't made to act like machines, because machines do not feel. we are made to do more than a machine could ever do. Machines are made to do the tedious work for humans so that we can achieve more and strive for perfection. Our society has set us Backwards. That is why I don't want anything to do with the government or the Progression of machines.

Signed,

Ed Finnerty
